Intramuscular injection, one-time dose.
Horses, cows: 0.033 - 0.067 ml per kg of body weight
Horses, cattle: 0.033 - 0.067 ml per kg body weight. Sheep, pigs, foals.
calves: 0.067 - 0.1 ml per kg body weight.
Dogs, cats: 0.1 - 0.13 ml per kg body weight
Use once daily for 2-3 days

Safety And Packaging

Side effects

1. Mainly allergic reactions, which may occur in most domestic animals, but the incidence is low. The local reaction at the injection site is characterized by edema and pain, and the systemic reaction is urticaria and rash, which may lead to shock or death in severe cases.
2. In some animals, penicillin may induce secondary infections of the gastrointestinal tract.

Precautions

1. This product is intended only for the treatment of chronic infections caused by highly susceptible strains of bacteria.
2. Attention should be paid to the interaction and incompatibility with other drugs so as not to affect the efficacy

Dormancy period

Meat
Cattle: 10 days
Sheep: 9 days
Pig: 7 days
Milk: 48 hrs

Packing

50ml/ bottle 100ml/ bottle

Packaging specifications can be adjusted according to customer requirements.
