

Drill Pipe Series

ANCHOR DRILL ROD

Made of high-quality hollow hexagonal steel such as 55SiMnMoV, the anchor cable drill pipe undergoes vacuum quenching and tempering treatment, with strong bending resistance. Used with anchor cable drill bits and connectors for mine roadway support and tunnel excavation drilling, Type I is suitable for soft rock and Type II for hard rock.

PRODUCT PARAMETERS

Specification			Main Purpose	Remarks
Diameter	Length	Thread Specification		
B19	500~3000	T16x6-M14	Drilling anchor bolt holes	Used individually
B19	500~3000	T16x6-T16	Drilling anchor cable holes	Connected by connectors
B19	500~3000	T18x6-T18	Drilling anchor cable holes	Connected by connectors
B22	500~ 6000	T19x6-M16	Drilling anchor bolt holes	Used individually
B22	500~6000	T19x6-T19	Drilling anchor cable holes	Connected by connectors
B22	500~6000	T20x6-T20	Drilling anchor cable holes	Connected by connectors
B25	500~6000	T22x6-M18	Drilling anchor bolt holes	Used individually
B25	500~ 6000	T22x6-T22	Drilling anchor cable holes	Connected by connectors
B25	500~6000	T24x6-T24	Drilling anchor cable holes	Connected by connectors
