LDZ ANCHOR FORCE GAUGE

The LDZ type anchor bolt tensile tester has a rated tension of 10 - 500kN, a wide measuring range, and high precision; the hydraulic system has a rated pressure of 63MPa. Mainly used for testing the anchoring force of anchor bolts in projects such as coal mines and tunnels, it judges the installation quality of anchor bolts by measuring the tension, ensuring support safety and roadway stability.

PRODUCT PARAMETERS

Model	Rated Tension	Rated Pressure	Working Stroke	Center Hole Diameter	Weight (kg)
LDZ 200	200kN	63MPa	60mm	φ25mm	7
LDZ 300	300kN	63MPa	60mm	φ32mm	12
LDZ 400	400kN	63MPa	60mm	φ36mm	14
LDZ 500	500kN	63MPa	60mm	φ40mm	18
