

Metal Mesh Series

MINING DIAMOND MESH

Common materials include low-carbon steel wire, galvanized wire, stainless steel wire, etc. The wire diameter range is 2.0-6mm, customizable. Common meshes are 5050mm, 6060mm, etc. The width is 1-6m, the length is unrestricted. Surface treatment includes galvanizing, dip coating, etc., which can effectively prevent corrosion and rust and adapt to the complex mine environment.

PRODUCT PARAMETERS

Model	Material	Wire Diameter (mm)	Mesh (mm)	Width (mm)	Length	Weaving Method	Surface Treatment	Steel Wire Tensile Strength (Mpa)	Steel Wire Elongation (%)
Diamond Mesh	High-quality low-carbon steel wire, galvanized wire	2.0-4.0mm (common)	40×40mm, 50×50mm, 60×60mm, 80×80mm, etc.	0.8m-3.0m (common), customizable	Customizable	Machine weaving	Electro-galvanizing, hot-dip galvanizing	300-500	≥ 12
