

## Pick Series

# PICK ACCESSORIES - PICK HOLDER SERIES

The mine pick holder is a key component of shearers and roadheaders, directly welded to the working end of the equipment. Forged from high-strength alloy steel, through heat treatment process, it has both high hardness and strong toughness. Suitable for various models of picks, it is firmly installed, can withstand strong impact, can greatly improve mining efficiency, reduce equipment loss, and extend service life.

Pick Holder U82

Pick Holder U92

Pick Holder S150

Pick Holder U170

Pick Holder S200

## PRODUCT PARAMETERS

| Model | Applicable Pick Diameter (mm) | Pick Holder Length (mm) | Pick Holder Width (mm) | Pick Holder Height (mm) | Mounting Hole Diameter (mm) | Material           | Hardness (HRC) |
|-------|-------------------------------|-------------------------|------------------------|-------------------------|-----------------------------|--------------------|----------------|
| U82   | 30 - 32                       | 110 - 120               | 45 - 50                | 70 - 80                 | 32 - 33                     | 42CrMo , etc.      | 40 - 50        |
| U92   | 32 - 35                       | 120 - 130               | 50 - 55                | 75 - 85                 | 35 - 36                     | 42CrMo , etc.      | 42 - 52        |
| U170  | 35 - 38                       | 140 - 150               | 60 - 65                | 90 - 100                | 38 - 39                     | 42CrMo alloy, etc. | 45 - 55        |
| S150  | 30 - 32                       | 105 - 115               | 40 - 45                | 65 - 75                 | 32 - 33                     | 35CrMnSi , etc.    | 40 - 48        |
| S200  | 32 - 35                       | 125 - 135               | 55 - 60                | 80 - 90                 | 35 - 36                     | 35CrMnSi , etc.    | 42 - 50        |
