

Pallet Series

MINE STEEL GUARD PLATE

Used for mine roadway support to resist surrounding rock deformation and rock fall impact, ensuring underground operation safety. Mainly made of Q235 and Q345 steel with yield strength above 345MPa, fixed by anchor bolts, it can effectively disperse pressure and enhance roadway stability.

Grid shape

W shape

PRODUCT PARAMETERS

Specifications	Aperture (mm)	Common Width (mm)	Common Thickness (mm)	Forming Height (mm)	Length (mm)	Breaking Force (kN)
W-type guardrail	40 (Customizable upon request)	220, 250, 280, 300, etc.	3.0, 4.0, 5.0, etc.	Approx. 23.3mm	Customizable upon request	≥ 284
Grid-type guardrail
