

Mine Anchor Cable Series

HOLLOW ANCHOR CABLE

The core equipment for deep support of mines/tunnels, the hollow rod body design realizes the integration of grouting and anchoring. With strong bonding force and high bearing capacity, it is suitable for complex surrounding rock, quickly stabilizing the rock mass and ensuring the safety and durability of engineering support.

PRODUCT PARAMETERS

Anchor Cable Strand Diameter	Nominal Steel Wire Diameter (mm)	Length	Installation Hole Diameter	Tensile Strength	Breaking Force	Hollow Grouting Pipe Specification	Grouting Pressure	Resin Anchoring Length (mm)	Elongation (%)
Φ22mm	6.0mm	Customized as required (e.g. 6000mm, 8000mm)	Φ30mm, Φ32mm, etc.	1670MPa, 1770MPa, 1860MPa, etc.	≥ 400KN, ≥ 380KN, ≥ 420KN, etc.	Inner diameter Φ7.5mm, outer diameter Φ10mm	4.0-6.0MPa, ≥ 5.0MPa, max 7.0MPa	1000-1500	≥ 3.5
