

Drill Bit Series

COAL AND ROCK DRILL BIT

Coal Drill Bit

Rock Drill Bit

Common specifications of mine coal and rock drill bits range from $\Phi 28\text{mm}$ to $\Phi 42\text{mm}$, used with hollow coal drill pipes or anchor cable drill pipes. The two wings are made of cemented carbide or polycrystalline diamond compact. Mainly used for drilling anchoring support holes in soft to medium-hard rocks in coal mines, suitable for roadways with rock hardness $f \leq 8$.

PRODUCT PARAMETERS

Specification		Wing Form	Structure
Diameter	Regular Connection Size		
$\Phi 27$	M14x1.5	2	Integral Type
$\Phi 28$		2	
$\Phi 30$		2	
$\Phi 32$		2	
$\Phi 34$		2	
$\Phi 36$		2	
$\Phi 38$		2	
$\Phi 42$		2	
$\Phi 45$		2
