

Steel Grating Series

Composite steel grating

Composite steel grating is composed of steel grating and a checkered plate; it combines high load-bearing capacity with sealed protection, features a flat surface, and offers enhanced safety in use.

Product detail

Product Name	Composite steel grating
Material	Carbon Steel + Checkered Plate / Galvanized Steel
Surface treatment	Hot-dip galvanizing, painting
Flat steel thickness	3mm – 10mm
Thickness of patterned plate	3mm – 6mm
Flat bar height	20mm – 100mm
Grid spacing	30×100mm / 40×100mm
Structural form	Composite welding of steel grating and checkered plate
Load-bearing capacity	High load-bearing capacity, anti-slip, and fall-prevention.
Packaging Method	Palletizing and steel strapping
Application Areas	Industrial platforms, walkways, bridge decks, heavy-load areas, etc.
