Industrial plant noise barrier

Factory-site noise barriers are designed for noise control in industrial areas; featuring a robust structure and high corrosion resistance, they effectively mitigate noise issues within the facility and the surrounding environment.

Product detail

Product Name	Industrial plant noise barrier
Material	Composite panel made of galvanized steel sheet, aluminum sheet, and sound-absorbing cotton
Surface treatment	Hot-dip galvanizing, powder coating, anti-corrosion coating
Plate thickness	1.0mm – 2.5mm
Screen height	2m – 8m
Screen width	500mm – 2000mm
Column specifications	H-beam / Square steel columns
Sound-absorbing structure	Composite sound-absorbing type, perforated type
Light transmission type	Fully enclosed / Semi-transparent
color	Grey, Blue / Customizable
Application Areas	Noise reduction for factories, power plants, equipment rooms, and industrial parks.
