Bridge noise barriers

Designed for the bridge environment, it is lightweight and securely installed; it effectively reduces traffic noise while meeting requirements for bridge safety and stability.

Product detail

Product Name	Bridge noise barriers
Material	Galvanized steel sheets, aluminum sheets, transparent PC sheets
Surface treatment	Hot-dip galvanizing, electrostatic powder coating
Plate thickness	1.0mm – 2.5mm
Screen height	2m – 5m
Screen width	500mm – 2000mm
Column specifications	H-beam / Bridge-specific column
Sound-absorbing structure	Perforated sound-absorbing type, composite sound-insulating type
Light transmission type	Semi-transparent / Fully enclosed
color	Grey, green / Customizable
Application Areas	Noise reduction projects for highway bridges, river-crossing bridges, and interchanges.
