Trench cover

Trench covers are fabricated from high-strength steel or steel grating; they offer high load-bearing capacity and excellent drainage performance, making them suitable for covering various types of drainage channels and load-bearing passageways.

Product detail

Product Name	Trench cover
Material	Carbon steel, stainless steel, galvanized steel
Surface treatment	Hot-dip galvanizing, electro-galvanizing, spray painting
Flat steel thickness	3mm – 8mm
Flat bar height	20mm – 80mm
Grid spacing	30×100mm / 40×100mm
width	200mm – 1000mm
length	500mm – 3000mm
Structural form	Flat Type / Framed Type
Load-bearing capacity	Drainage, anti-slip, and compression resistance
Packaging Method	Pallet packaging, secured with steel strapping
Application Areas	Drainage ditches, cable trenches, municipal roads, plant site drainage, etc.
