Perforated metal mesh

Perforated mesh is manufactured from high-quality metal sheets using CNC punching; it features diverse hole patterns and uniform arrangements, combining excellent functionality with decorative appeal.

Product detail

Product Name	Perforated metal mesh
Material	Low-carbon steel plate / Stainless steel plate / Aluminum plate / Galvanized steel plate
Plate thickness	0.3mm – 10.0mm
Pass shape / Roll pass profile	Round holes / Square holes / Oblong holes / Hexagonal holes / Custom hole patterns
Pore size	0.5mm – 100mm (customizable)
Hole spacing	0.8mm – 150mm
Open area ratio	10% – 70% (depending on the design)
Panel dimensions	1m×2m / 1.2m×2.4m / 1.5m×3m / Customizable
Processing method	CNC Punching / Laser Punching
Surface treatment	Spray Painting / Powder Coating / Anodizing / Galvanizing / Polishing
color	Natural / Black / White / Custom Color
Features	Good breathability / High strength / Attractive and durable / Customizable
Packaging Method	Wooden crate packaging / Pallet packaging / Protective film packaging
Application Areas	Architectural decoration, sound barriers, filtration equipment, mechanical guarding, curtain wall decoration, etc.
