Welded Gabion Mesh

Welded gabion mesh is manufactured from high-quality steel wire; it features a robust structure and uniform mesh openings, offering high load-bearing capacity and excellent corrosion resistance, making it suitable for heavy-duty protection and landscaping projects.

Product detail

Product Name	Welded Gabion Mesh
Material	Galvanized steel wire, low-carbon steel wire
Surface treatment	Hot-dip galvanizing, PVC powder coating
Wire diameter	3.0mm – 6.0mm
Pore size	50×50mm / 75×75mm / 100×100mm
Enclosure Specifications	1×1×1m / 2×1×1m
Welding method	Spot-welding and forming
Application Areas	Landscape walls, retaining walls, decorative works, slope protection works
