

Expanded Metal Mesh Series

Expanded metal mesh

Expanded metal mesh is formed from high-quality metal sheets through a process of slitting and stretching; it features a seamless, integrated structure with no weld points, combining strength with air and light permeability.

Product detail

Product Name	Expanded metal mesh
Material	Low-carbon steel plates, stainless steel plates, aluminum plates
Surface treatment	Galvanizing, powder coating, and oxidation treatment
Plate thickness	0.5mm – 8mm
Pass shape / Roll pass profile	Diamond, hexagonal, and fish-scale shapes
Short pitch	5mm – 100mm
Long pitch	10mm – 250mm
width	0.5m – 2m
length	1m – 6m
Application Areas	Architectural decoration, protective covers, platform treads, filtration, etc.
