COMPANY PROFILE

Cangzhou Coente Electronic Case Co., LTD., founded in November 2017, is located in East Development Zone, Qingxian County, Cangzhou City, is a high-end CNC sheet metal enterprise positioning in a variety of varieties, small batch, customized, currently has from sheet metal rapid proofing, small batch production, to mass production of elastic processing mode for different customer service options.

Mainly using numerical control sheet metal technology, research and development, design, production and sales of industrial numerical control sheet metal structural parts, to provide products and services for well-known enterprises at home and abroad; Products with steel sheet, stainless steel plate, aluminum plate and copper plate as raw materials, through the multi-process production of specified sheet metal structural products, used in electric power, security, communications, medical, financial and new energy and other fields of terminal products.

CORPORATE CULTURE

BUSSINESS

The company attaches great importance to talents, constantly training and improving the professional quality of employees, to create a high-tech team.

20 +

After more than 20 years of development

100 +

Serving more than 100 countries

500 +

More than 500 R&D staff

Enterprise purpose

Realistic, innovative, efficient, mutually beneficial

The company adhering to create a competitive development space, 5S management as the basis, so that employees consciously follow the company's processes to carry out work while fully mobilize the potential and enthusiasm of each employee.

Management policy

Simple and efficient management mode

It lays a solid foundation for the sustainable development of the enterprise, and makes the company grow into a customized sheet metal expert with "standard management, leading technology and excellent quality".

Service advantage

Customized finish

You can choose from a variety of surface treatments according to your needs.

Material selection

Can be selected in a variety of different metal plate, strength, electrical conductivity, weight, corrosion resistance varies.

Accuracy

Kornter offers a wide range of tolerance options in compliance with ISO 2768 (Standard, fine) and ISO 286 (grades 8, 7, 6).

Quality control

Our quality Assurance department implements a strict quality assurance process.

Fast delivery

Kornter combines new cutting, bending and punching technologies with automation to provide real-time quotes on sheet metal services and complete parts manufacturing within 10 working days.

Fast delivery

We can ship parts to all countries and regions. Simply request a quote to view the CNC component quotation and delivery options.

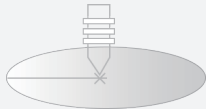

Production research and development

Laser cutting

We always adhere to nitrogen cutting to ensure that each workpiece can zero oxide layer.

Numerical control bending

We use advanced production equipment to ensure the accuracy of every line of products.

Process flow

We adhere to the management standard, leading technology, excellent quality management mode

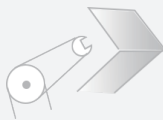

Strictly standardize each step of the production process

Ensure high quality and high precision output of products

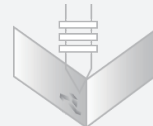

Automatic welding

Standardized automatic welding robot, the efficiency is ten times that of artificial production, high efficiency, more stable quality.

Custom logo (printing)

The logo provided by users can be printed on the surface of the product.

Custom finish

Users can choose from maintaining the original state after processing, spraying service, surface treatment, heat treatment, customization, etc.

Processing shop

In order to adapt to the changes of the international market and better meet customer needs, the company has introduced laser cutting machine, CNC punch, CNC bending machine and other high-end sheet metal processing equipment. At the same time, we also have a complete spray screen printing line to ensure the quality and stability of products.

Processing case

Kornter produces specified sheet metal structural parts through multiple processes, processing covers electric power, security, communications, medical, financial and new energy and other fields of terminal products. We specialize in the shell processing of all products. If product

integration or overall supporting production is needed, further communication is needed. Our processing cases include but not limited to vending, medical, logistics, communications, environmental protection, other series and so on. Some cases are shown as follows:

Activated carbon environmental protection box

Environmental protection equipment

Environmental monitoring equipment

Environmental monitoring
Environmental protection Series

Intelligent recovery equipment

Garbage recycling
Environmental Protection Series

Battery cabinet

Communication series

Intelligent express cabinet

Logistics series

Environmental monitoring equipment

Self-print payment
Medical Series

Pink vending machine counter

Vending series

Triple console

Control console

Stainless steel chassis cabinet
